COME VIENE CREATO IL CODICE

/ Our coding system

Vapsint ha adottato un nuovo sistema di codifica che riporta:

- la tipologia di molla a gas (standard, frizionata, idraulica ecc.)
- la combinazione diametro corpo/stelo ed il materiale con cui la molla è composta
- la configurazione pistone
- tipologia attacco corpo
- tipologia attacco stelo
- lunghezza tutto aperto (LTA)
- corsa utile (CU)
- spinta espressa in Newton

Per maggiori informazioni si invita a consultare il nostro sito web.

Vapsint has adopted a new coding system which indicates:

- *the type of gas spring (standard, friction stop, hydraulic, etc.);*
- *cylinder/piston rod combination diameters and the material used;*
- *piston configuration;*
- *cylinder end fitting;*
- *piston rod end fitting;*
- *length fully extended. (LTA);*
- *stroke (CU);*
- *force in newtons;*

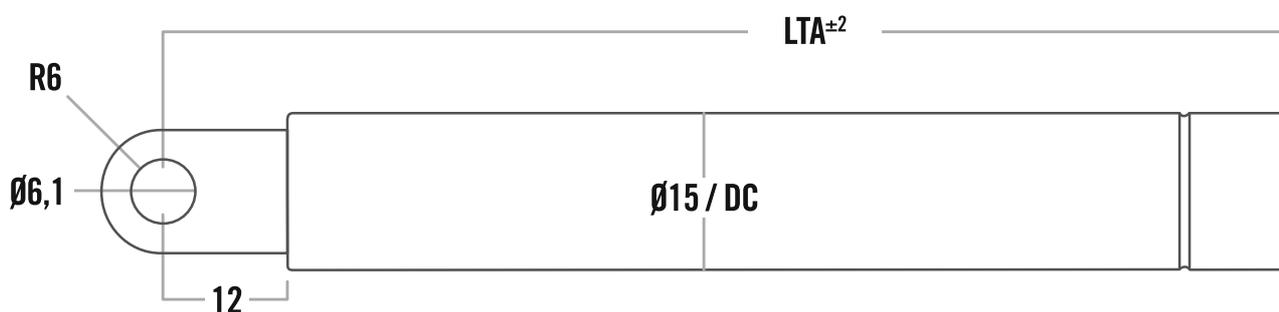

For more information, please visit our website.

LEGENDA

/ Key

DC	∅ Cilindro <i>Cylinder ∅</i>	CU	Corsa utile in mm <i>Stroke in mm</i>	DS	∅ Stelo <i>Piston rod ∅</i>
-----------	---------------------------------	-----------	--	-----------	--------------------------------

LTA	Lunghezza tutto aperto misurata come segue: ATTACCHI FORATI LTA = interasse fori; ATTACCHI SNODATI LTA = interasse da centro sfera a centro sfera; FILETTI LTA = base filetti (filetti esclusi).	<i>Fully extended length measured in the following way:</i> EYELETS <i>LTA = hole centre-to-centre distance;</i> BALL JOINTS <i>LTA = hole centre-to-centre distance;</i> THREADS <i>LTA = threaded base (threads excluded);</i>
